# Built for practical industrial operations.

## Production planning & scheduling

Optimize production cycles, manage BOMs and automate machine allocation.

## Inventory & materials management

Real-time visibility into raw materials, work-in-progress and finished goods.

## Financial & cost tracking

Integrated cost accounting, expense tracking and financial reporting.

## Operational KPIs & dashboards

Monitor plant efficiency, output and KPIs across every department.

# Plan, schedule and track every run.

## BOM & scheduling

Bills of material, routing and production schedules in one place.

## Orders & floor entries

Work orders and shop-floor entries tracked in real time.

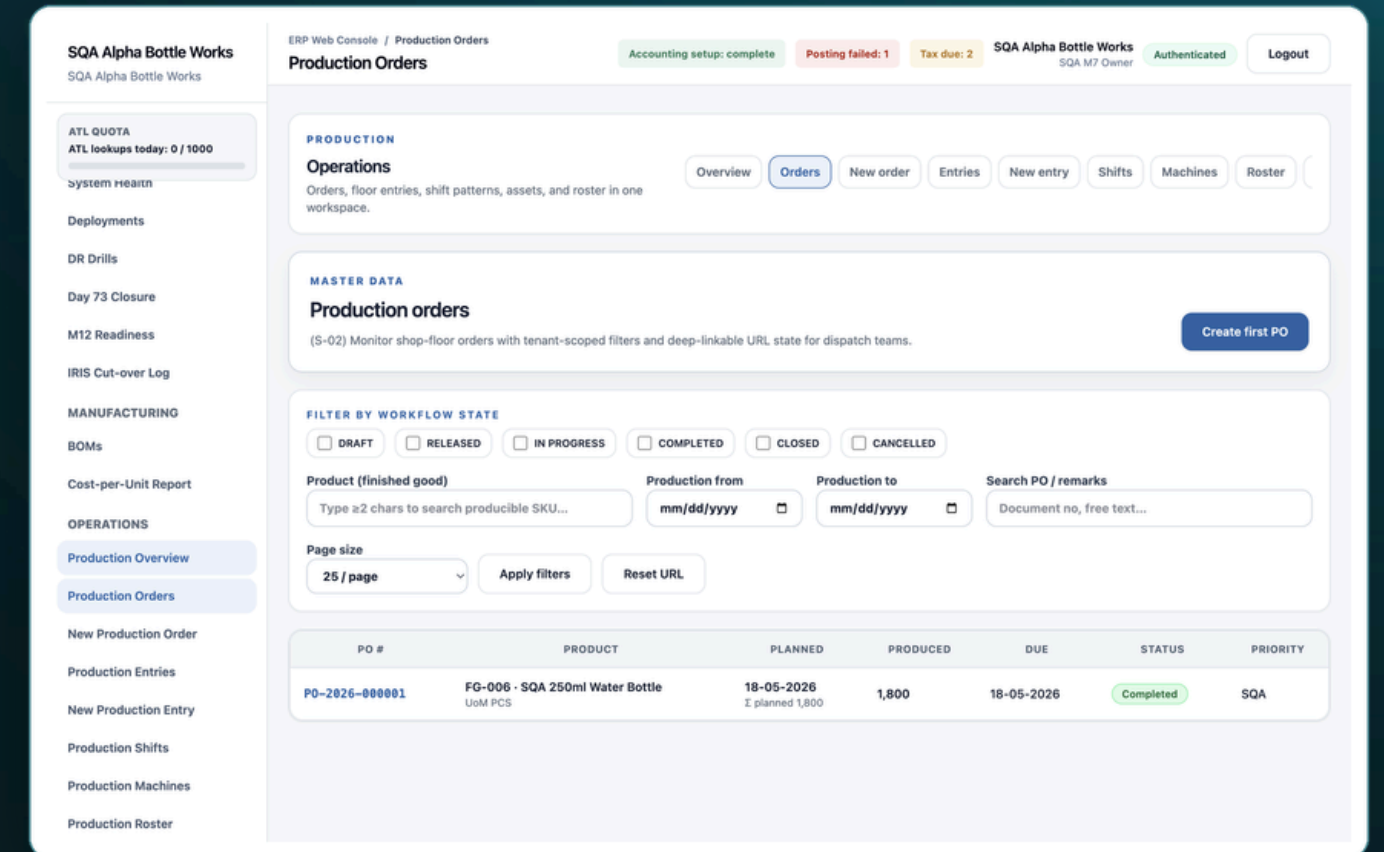

## Machines & shifts

Machine allocation, shift patterns and roster management.

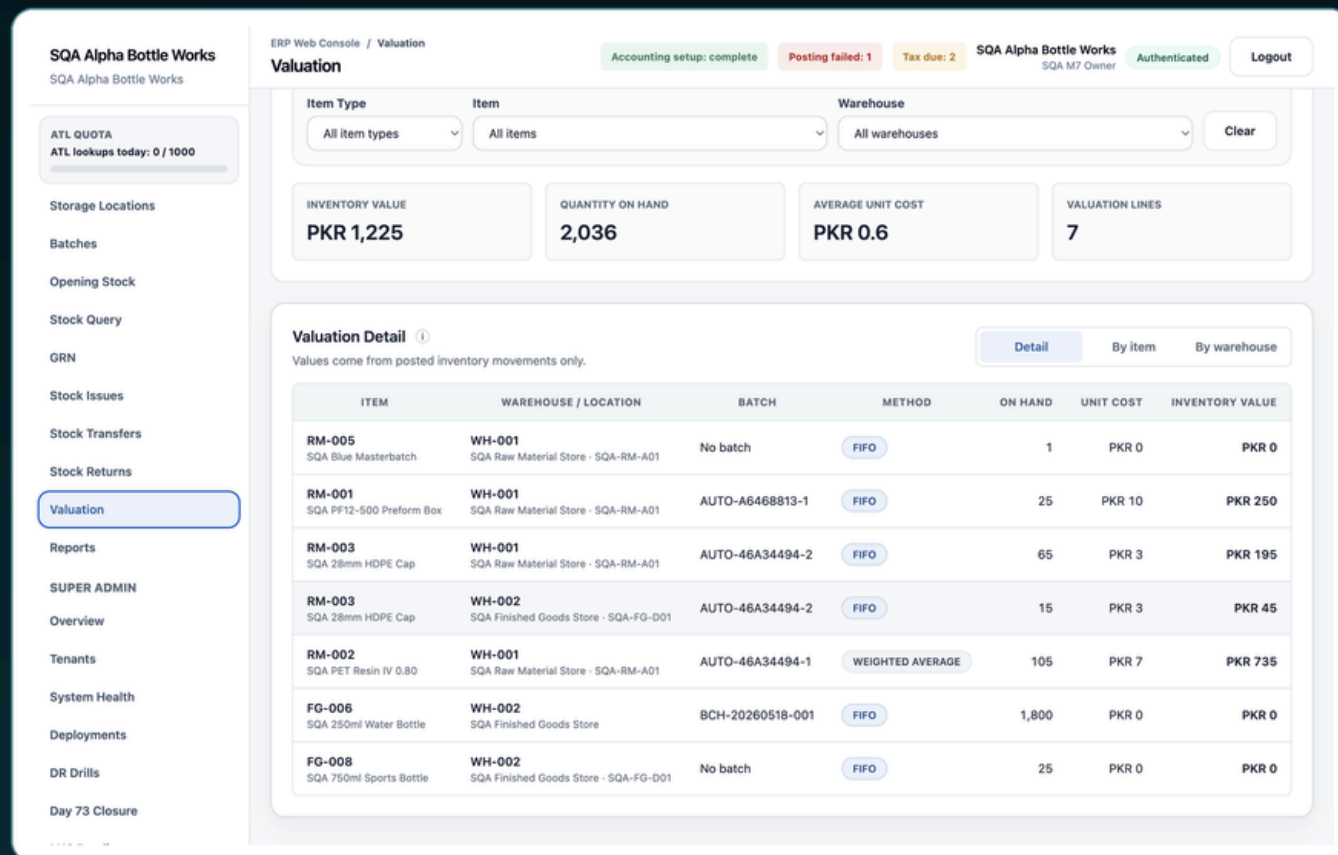

## Cost-per-unit

Live production cost and efficiency by product and run.

Production orders with workflow-state filters.

# Every material, batch and movement.

— ONE PLATFORM, EVERY FUNCTION

# The full manufacturing back office.

From the shop floor to the general ledger, every department works from the same tenant-scoped platform.

## Production

Orders, entries, shifts, machines, BOMs, roster.

## Inventory

Warehouses, batches, counts, transfers, valuation.

## Procurement

Suppliers, purchase orders, GRN, invoice matching.

## Master data

Raw materials, finished goods, customers, UOM.

## Sales & dispatch

Quotations, orders, dispatch notes, gatepasses.

## Finance

GL, AP/AR, aging, bank & cash, receipts.

## Tax & compliance

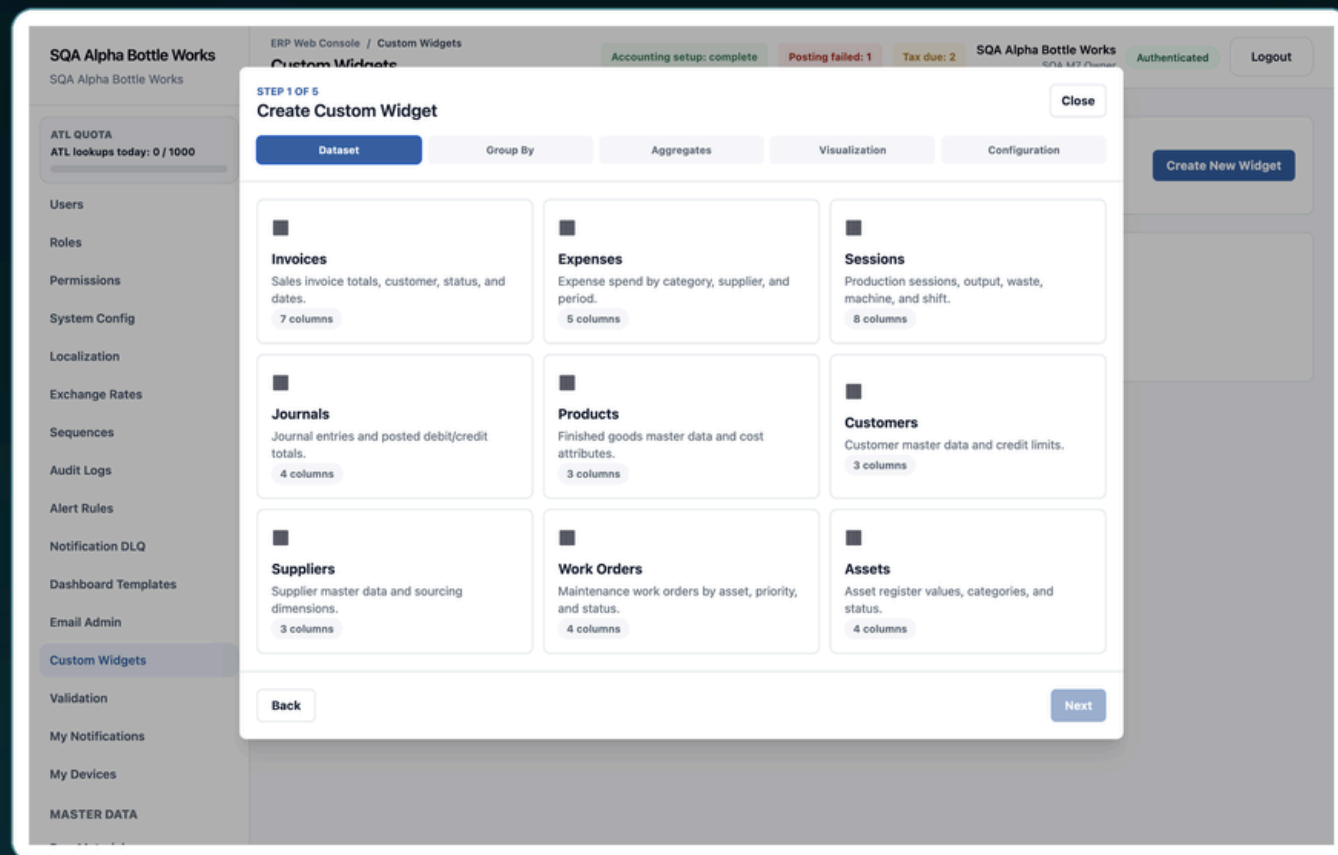

FBR / SRB / PRA / KPRA, IRIS, validation.

## Admin & governance

Users, roles, audit logs, alerts, localization.

# Insight that reaches every desk.

Self-serve custom widget builder.

## Real-time dashboards

Drag-and-drop operational widgets, refreshed live.

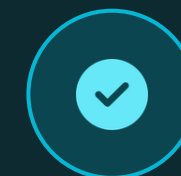

## Custom widget builder

Build widgets from any dataset — no code required.

## AI predictive analytics

Detect bottlenecks, forecast demand, optimize schedules.

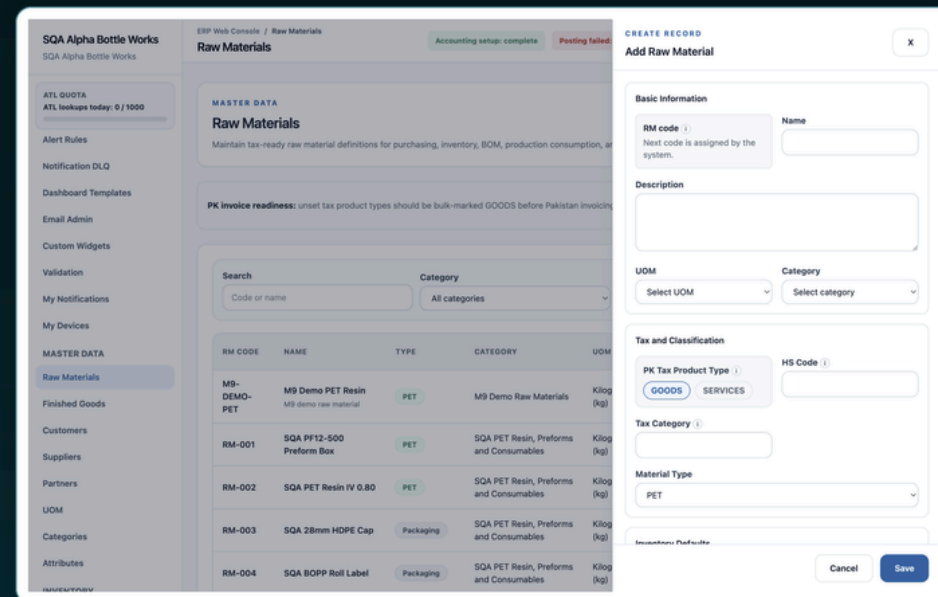

## Validation & reconciliation

Sub-ledger checks with PASS / WARN health signals.

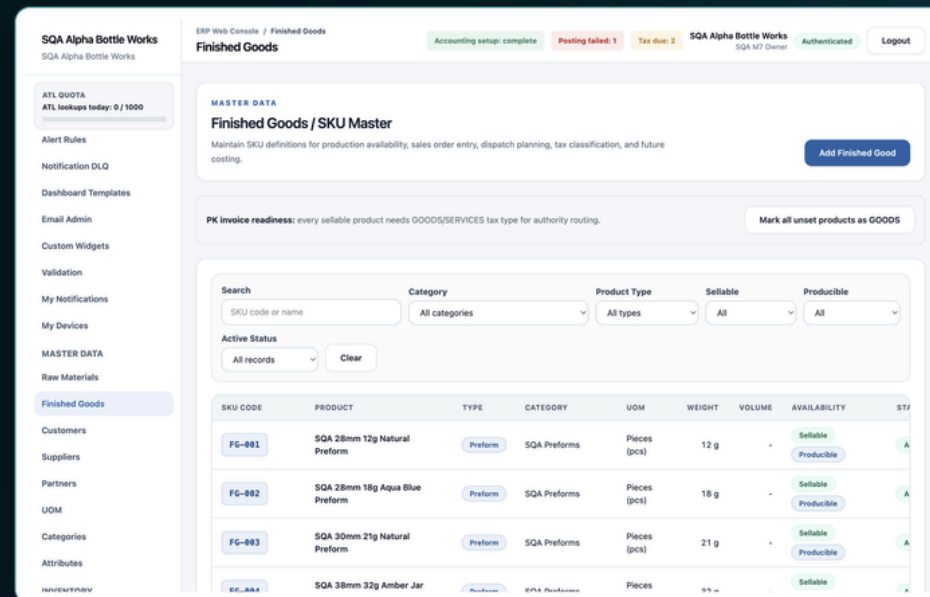

# See the platform at work.

Tax-ready master data, sellable SKUs and a full journal register — the operational depth beneath the dashboards.

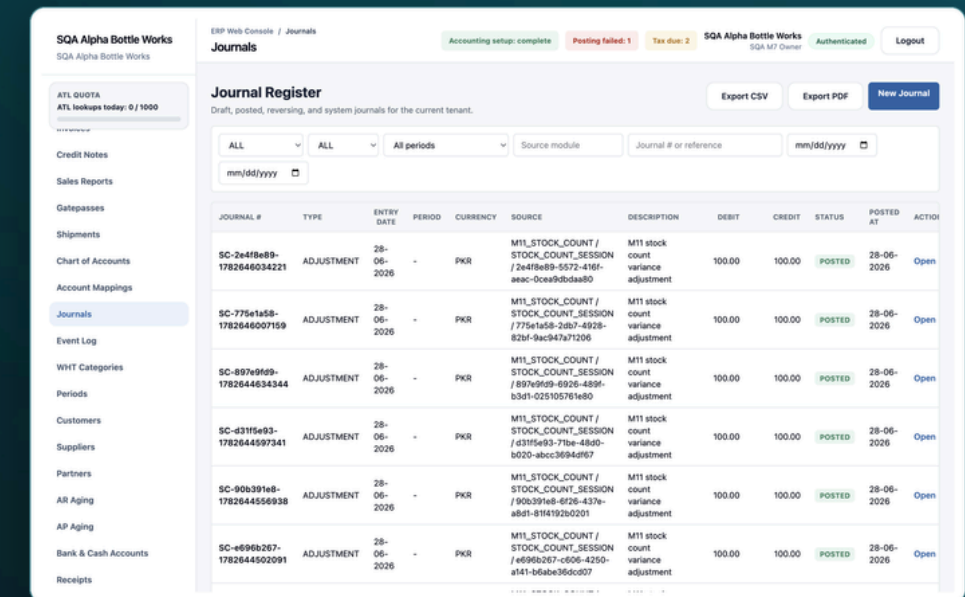

**Raw materials master**

Tax-ready material definitions and classification.

**Finished goods / SKU master**

Production-ready SKUs with tax and costing.

**Journal register**

Draft, posted and system journals, fully traced.

# Governed, traceable, secure.

## Role-based access (RBAC)

Department-level visibility scoped to each role.

## Audit-ready workflow logs

Every action logged for compliance and traceability.

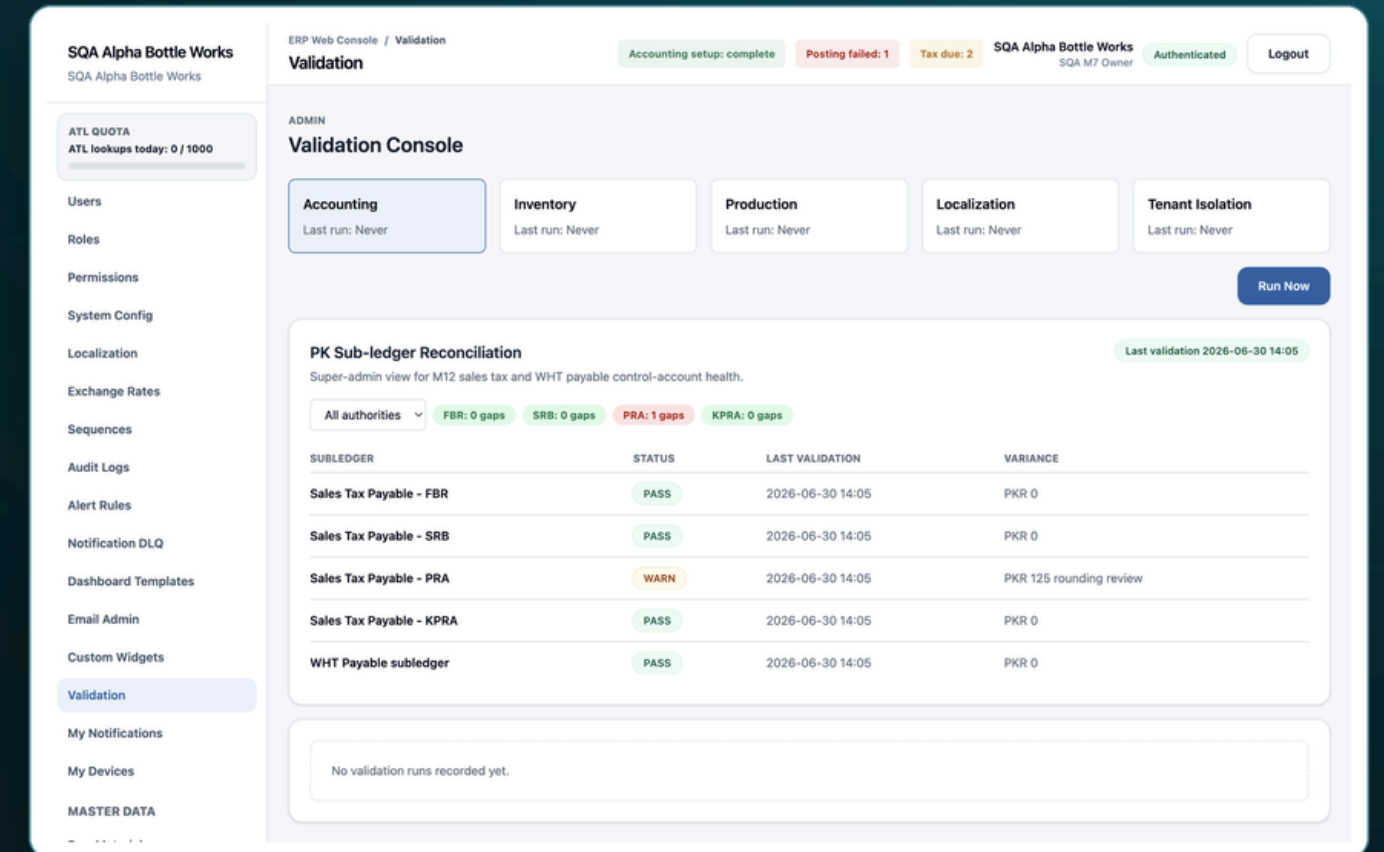

## Encrypted & secure auth

Encrypted transmission and secure authentication.

## AI-monitored process control

Sensitive production and financial data watched by AI.
